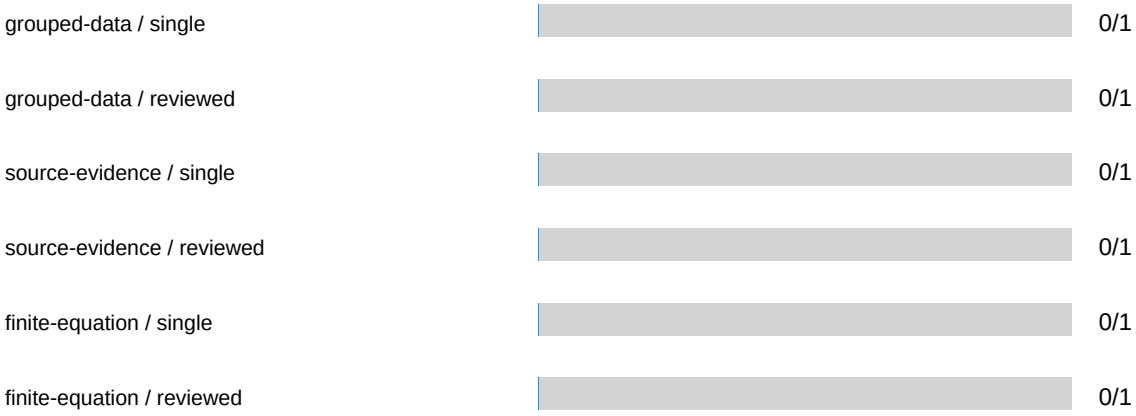
Research capability qualification

Mode: live. Bounded supplied-input tasks; no claim of open-ended discovery or general domain expertise.

Source bundle: examples/capability-campaign/records/native-qualification

Task / arm	Verified / attempted	False success
grouped-data / single	0 / 1	0
grouped-data / reviewed	0 / 1	0
source-evidence / single	0 / 1	0
source-evidence / reviewed	0 / 1	0
finite-equation / single	0 / 1	0
finite-equation / reviewed	0 / 1	0



Bars show exact verified / attempted counts. All failures remain in the denominator. Marginal Wilson intervals and per-stage traces are in report.json. This development qualification does not establish a reliability threshold. Dollar cost is unknown for native subscription sessions.
