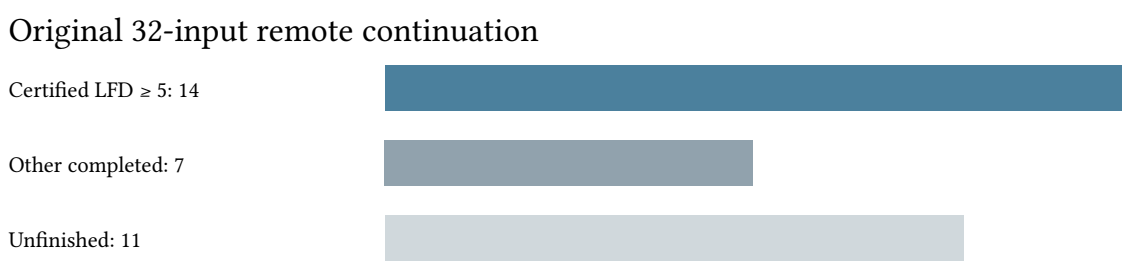
Certified n44 random input 02

The original independent checker accepts the degree-four certificate for fresh-n44-rand-02 with codimension lower bound 31,780. Exact enumeration gives two solutions. This establishes LFD at least 5 for this named input. No degree-six or upper bound follows.

All 47 recorded artifact hashes and the frozen request identity were verified after download. All steps returned zero without timeout. Certificate bytes: 597544256; SHA256: 9f76c975ffbf94d90b705c7ee8d9ec9c00c31512736e97415fa2e6a0d62842db. The complete evidence archive passed anonymous download and certificate-hash verification.

The original 32-input remote continuation now has 21 completed inputs, including 14 certified LFD at least 5 bounds; 11 remain unfinished. Retries are not additional draws. No population-frequency conclusion or timing comparison is made.


Job semaev-panel-n44-rand02-v3-20261030-0125, UID 2796f377-1b66-4674-85e6-827e2c279a02, completed 2026-10-30T02:15:44Z. Original protocol: ../../panel-protocol-v3.json. The certificate argument is unchanged; this report adds named-instance evidence.
