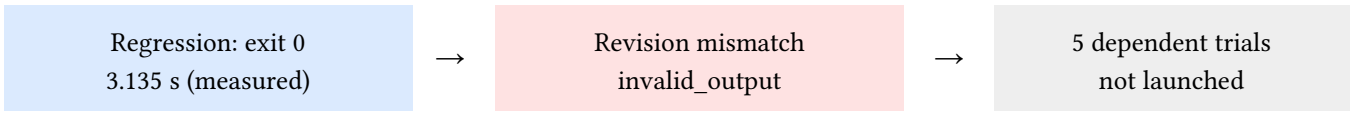
Run report: EXP-PEXT-0b2c75



RUN-PEXT-8c15bf: execution diagram, no comparison

Hypothesis H-PEXT-ad0073; goal GOAL-PEXT-4a1d6b. Run RUN-PEXT-8c15bf; trial regression. Raw records: experiments/EXP-PEXT-0b2c75/runs/RUN-PEXT-8c15bf

6 planned trials, 1 attempted, 0 output-validated, 5 dependent trials not launched. Process exit 0; no timeout. Supervisor status: invalid_output; independent output checker did not run. The driver manifest says completed_valid, which is not supervisor acceptance.

Failure: driver manifest run.code.commit='817c782d25bfe62af22f3639dd53fc267f8bb89c' contradicts the launch authority's '69c7a6aaec914916af6a3a967ccb93ac4b00da1f'

This session committed the earlier SEMBIN report during execution, changing HEAD. The invalid attempt is preserved. No frozen plan or existing output was modified.

Authority commit: 69c7a6aaec914916af6a3a967ccb93ac4b00da1f; driver commit: 817c782d25bfe62af22f3639dd53fc267f8bb89c; driver dirty state: False

Measured wall time 3.135 s; CPU 4.538 s; peak RSS 232861696 bytes. Host 4521696e89cd; Python 3.12.14; rustc 1.99.1 (58cf8f9c3 2026-10-13).

Seed 20261101; threads 4. Parameters and declared controls are unchanged from trial-plan.json. This was the regression/control stage. No independent certificate validation or uncertainty assessment completed.

Exact command: ["python3", "experiments/EXP-PEXT-0b2c75/implementation/run.py", "trial", "--run-dir", "/workspace/crypto-autoresearcher/experiments/EXP-PEXT-0b2c75/runs/RUN-PEXT-8c15bf", "--run-id", "RUN-PEXT-8c15bf", "--trial-id", "regression", "--plan", "experiments/EXP-PEXT-0b2c75/trial-plan.json"]

Raw outputs: regression.json, raw-result.json, R-n5-q3.jsonl, R-fix-n5-q3.jsonl. All log and environment files are retained beside execution-receipt.json. The diagram shows the execution sequence because there are no comparative measurements.

Next diagnostic: reconcile this invalid attempt through experiment preparation; isolate future execution from commits to HEAD. Do not reuse the immutable run directory.

Operational sources checked: README.md, the run skill, selected trial plan, specification and implementation. No new scientific method, novelty claim or mathematical literature assessment is made. Canonical scientific graphs are unchanged; the report records an infrastructure failure.
