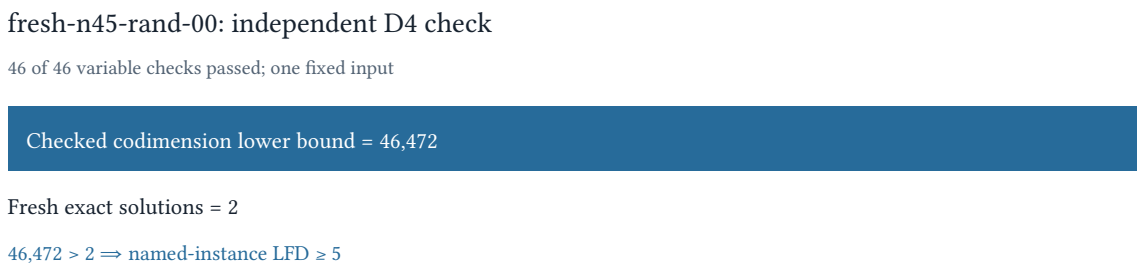
Certified n45 random00: LFD at least five

The independent D4 checker accepted all 46 variable multiplication checks for fresh-n45-rand-00. It certified codimension at least **46,472** and fresh exhaustive enumeration found **2** solutions. Thus the strict inequality establishes **LFD at least 5** for this named Boolean presentation.

The certificate is 1,045,099,360 bytes with SHA-256 01abd5f6072faecb3d91e62b64e9252125b3a0a3b7ee28c350805fe445ffe02f. The collector checked all 47 worker artifacts and successful terminal return; three controls passed. Public certificate and evidence readback were verified.



Admission passed after 70.499 seconds at 45,493,157,888 bytes available. Producer and checker took 2099.692 and 496.435 seconds. The original panel now has 28 terminal, 21 certified LFD-at-least-five, and four remaining inputs. Frozen source 608be655740605d96d97157006c29894332a72db; protocol 39569a234a66ef4997903c886b4cf6ac4ba0c8a409f85d81488c869c2a36b95a.

Input n=45, k=23, seed 6295638813592517003, degree 4. Runtime command and paths are in report.md and the frozen plan. CPU time was not recorded.
